

Frozen Pops!

Featuring all the tools you need to create gelato and frozen yogurt pops.

- Brand New:**
- 312100 Frozen Pop Mold
 - 312110 Frozen Pop Holder (for display)
 - 312120 Wooden Frozen Pop Sticks

Assembly Instructions

1. Pipe desired gelato or frozen yogurt flavour into frozen pop mold and insert sticks.
2. Place in the blast freezer until set.
3. Quickly unmold frozen pops and store in regular freezer for at least 15 minutes until ready to coat.
4. When ready to coat, melt desired Coriandolina® Frozen Pop Coating in microwave.
5. Carefully dip frozen pop in coating; allow excess to drip off frozen pop; place on a parchment lined sheet pan and store in the freezer until ready to eat.

Frozen Pop Coatings

Coriandolina® coatings are an innovative product that comes as a solid paste, is heated into a liquid and then hardens into a delicious flavoured frozen pop coating as it cools. Our five Coriandolina® coatings are available in these trendy flavours:

- 90602 Chocolate Coriandolina®
- 90402 Coffee Coriandolina®
- 90802 Lemon Coriandolina®
- 90702 Strawberry Coriandolina®
- 90502 White Chocolate Coriandolina®

Other Great Ways To Use Your Coriandolina® Frozen Pop Coatings –

Use these ideas to get started, and then imagine your own concoctions coated with the trendy Coriandolina® Frozen Pop Coatings.

Apple Pops • Cookie Pops • Pretzel Pops • Marshmallow Pops

Helpful Pop Tips:

- It is best to let pops harden in a blast freezer; but if you do not have one, just leave the pops in their molds in your regular freezer overnight before coating.
- For frozen pops, the first layer of coating may crack due to the temperature change – try doing a light coating first to allow for a second dip.
- For marshmallows, wait to insert the stick until the consistency is semi-solid; otherwise, the stick may fall off-center.
- For cookie pops, you may need to use a little chocolate or marshmallow cream to cement the stick, and then allow to dry so the pop does not fall off when you are dipping to coat.
- Transfer sheets can be used to add a pattern to the outside of your dipped pop; simply rest the pop onto the transfer sheet immediately after dipping and remove after hardening completely.
